

Blackhawk CCTV Composite IP Cable Assembly BH-026

Blackhawk CCTV composite IP cable assemblies provide high quality cables within a single jacket for ease and neatness of CCTV installations. Two 14 ga. TFFN wires provide power and a Cat5e is used for Video/Data control of the camera. The MS-connector end is professionally pinned, tested and sealed, using a dual UV-resistant potted heatshrink. Custom cable lengths can be ordered up to 300 ft.

With a rugged UV resistant PVC jacket, the composite cable provides an ideal solution for most outdoor and indoor CCTV applications, including camera lowering devices.

Outer Jacket:

Material	UV Resistant PVC
Nom. Jacket Thickness	.09"

Power:

No. of wires	2
